### Fancy Molasses

Fancy Molasses is the highest grade of molasses. It's made from pure sugarcane juice that has been inverted into a syrup (not unlike the maple syrup-making process). Fancy molasses is tangy sweet in flavor. It contains no additives, is unsulfured, gluten-free and non-GMO. Our fancy molasses is considered a source of iron and a good source of riboflavin.

## MOLASSES 100% NATURAL

- Tasty & nutritious
- Made from pure sugarcane
- A source of iron, riboflavin and potassium
- No preservatives
- Gluten free

## MORE ABOUT OUR MOLASSES

### Cooking Molasses

Cooking molasses is a blend of blackstrap and fancy molasses. It is thicker and darker than fancy molasses – less sweet, with a more “full-flavoured” taste. Any product made with cooking molasses will have a much more robust “molasses” flavour than if fancy molasses is used.

### Blackstrap Molasses

Blackstrap molasses is a nutrient-rich product with a robust, bitter-tart flavor. Crosby's blackstrap is a byproduct of the raw sugar manufacturing process. It is nutrient dense and is considered a good source of iron and magnesium and an excellent source of riboflavin and potassium. It is also considered a source of calcium, selenium, vitamin B<sub>6</sub>, manganese and copper.

### We Don't Add Sulfur

Crosby's does not add sulphur to any of our products.
