MORE ABOUT OUR MOLASSES

Fancy Molasses

The highest grade of molasses available, fancy molasses is the pure juice of the sugar cane, condensed, inverted and purified. It is 100% natural and contains no additives or preservatives. It is lighter in colour than the other molasses products, and the flavour is tangy sweet. All the recipes in this cook book are made with fancy molasses.

Cooking Molasses

Cooking molasses is a blend of blackstrap and fancy molasses. It is thicker and darker than fancy molasses – less sweet, with a more “full-flavoured” taste. Any product made with cooking molasses will have a much more robust “molasses” flavour than if fancy molasses is used.

Blackstrap Molasses

Blackstrap molasses is the highly-concentrated, final by-product of the sugar manufacturing process. As the sugar crystallizes, the residual cane juice thickens into a dark mass and is separated out through a centrifuge. The resulting molasses is very dark with a robust, somewhat bitter flavour. Like fancy molasses, it is a pure product and contains no added sulphates or sulphites. Blackstrap molasses is recognized for its health benefits and is an excellent source of many minerals and nutrients including iron, magnesium and calcium.

We Don't Add Sulfur

Crosby's does not add sulphur to any of our products.

MOLASSES 100% NATURAL
